WELDING JOURNAL INDEX

VOLUME 72 — 1993

PUBLISHED BY THE AMERICAN WELDING SOCIETY, 550 N.W. LEJEUNE RD. MIAMI, FL 33126

Part 1 — WELDING JOURNAL

SUBJECT INDEX

Advanced Materials, Rapid Infrared Joining Takes on the — C. A. Blue, S. G. Warrier, M. T. Robson and R. Y. Lin, 51 (Jun.)

Advances in Thermal Spray Coatings Broaden Their Applications — E. Sampson, 39 (Jul).

Alaska's Oil Patch Places Heavy Demands on Welding, Giant Project for — B. Irving, 43 (Apr).

Aluminum Alloys at the Paton Institute, How They Learned to Flash Weld High-Strength — S. I. Kuchuk-Yatsenko,V. T. Cherednichok and L. A. Semenov, 31 (Jul).

Aluminum Brazing in Vacuum Furnaces, Techniques for — W. Hoke III and C. Amenheuser, 65 (Oct).

Artificial Intelligence to the Control of GMA Welding, Fourth Generation Inverters Add — T. J. Nacey, 31 (Jan).

Astronaut Experiments with Soldering in Space, U.S. — P. Chien, 46 (Oct).

Austenitic Stainless Steels, What You Should Know About — H. R. Castner, 53 (Apr).

Auto Body Engineers Pay Serious Attention to the New Welding Technologies — B. Irving, 74 (Dec).

Automating Brazing and Soldering Operations, What to Consider Before — C. M. Norlin, 57 (Oct).

Automotive Manufacturing?, Will the YAG Laser Revolutionize — B. Irving, 52 (Jul).

AWS International Welding Exposition: 1993 Review — A. Cullison and B. Irving, 29 (Aug).

Basics of Semiautomatic Welding, The — G. D. Uttrachi and D. W. Meyer, 47 (Aug).

Big Boom in American Railroads Means More Jobs for Welders — B. Irving, 39 (Sep).

Braze Coat Process Combines with Induction Heating for Deposition of Wear-Resistant Materials — E. Lugscheider, K. Gundlfinger and H. Schmoor, 55 (May).

Brazing and Soldering Operations, What to Consider Before Automating — C. M. Norlin, 57 (Oct).

Brazing in a Nitrogen-Based Atmosphere Offers Advantages —B. B. Bonner, D. Garg and P. T. Kilhefner, 31 (Oct).

Brazing in Vacuum Furnaces, Techniques for Aluminum — W. Hoke III and C. Amenheuser, 65 (Oct).

Bridges, Thermal-Sprayed Zinc Coatings Defend Steel and Concrete — B. Irving, 69 (Sep).

Cast Iron, Unraveling the Mysteries of Welding — G. D. Uttachi and D. W. Meyer, 47 (Aug).

Choosing a Robotic Welding System, What to Know Before — M Schnee, 58 (Dec).

Classification Trees Prove Useful in Nondestructive Testing of Spot Weld Quality — A. Ercil, Y. Denizhan, A. Okcular and G. Zora, 59 (Sep).

Cleaning, Brushing Up on Pipe and Tube Weld — R. C. Sawyer, 71 (Dec).

Cleveland Baseball Stadium Scores with Welded Tube Framework — 57 (Nov).

College Couples with Railroad to Keep the Trains Running on Time — M. R. Johnsen, 81 (Sep).

Companies Need, On the Job: What Welders Want and — A. Cullison, M. R. Johnsen and H. Woodward, 30 (Dec).

Competitive Forces Demand Growth of Application Software for Welding — N. D. Gustafson, 43 (May).

Computer-Aided Orbital Welding Reaches a New Level of Performance — J. G. Galloway, P. Y. Y. Maak and S. C. McNabb, 23 (Feb).

Computer Software Improves Weld Program Management — C. Minda, and A. Johnson, 52 (May).

Computer Software Tracks the Life of Welding Projects — 47 (May).

Computers Let Robot Keep in Touch with Manufacturer — 44 (Dec).

Controller Delivers the Heat Where It's Needed, Resistance Weld — A. Cullison, 47 (Jun).

Controlling Welding, Microcomputer Takes Charge for — B. Irving, 49 (May).

Copper Foils, Resistance Seam Welding of Thin — D. L. Hollar, Jr., 37 (Jun).

Cored Wires, Electrode Extension Often Neglected When Using Self-Shielded — R. B. G. Yeo, 51 (Jan).

Cutting and Welding Creates Precision, Lightweight Structure, Laser Beam — O. Lund and L. Bartoszek, 71 (Mar).

Darkroom Speeds Up Processing of Nondestructive Field Tests, Mobile — 47 (Mar).

Demand for Plastic Parts Builds in the Welding Industry — B. Irving, 31 (Feb).

Destructive Testing Can Keep Failures from Happening, How — B. Irving, 33 (Mar).

Dinos Stand Tall, Jurassic "Sparks": Making the — M. R. Johnsen, 41 (Nov).

Electrode Extension Often Neglected When Using Self-Shielded Cored Wires — R. B. G. Yeo, 51 (Jan).

Electrodes?, What's Behind the Success of the Top Ten Welding — B. Irving, 28 (Jun).

Electron Beam Weld Penetration, Technical Note:

Computer Software Improves Weld Program Management — C. Minda, and A. Johnson, 52 (May).

Computer Software Tracks the Life of Welding Projects — 47 (May).

Computers Let Robot Keep in Touch with Manufacturer — 44 (Dec).

Controller Delivers the Heat Where It's Needed, Resistance Weld — A. Cullison, 47 (Jun).

Controlling Welding, Microcomputer Takes Charge for — B. Irving, 49 (May).

Copper Foils, Resistance Seam Welding of Thin — D. L. Hollar, Jr., 37 (Jun).

Cored Wires, Electrode Extension Often Neglected When Using Self-Shielded — R. B. G. Yeo, 51 (Jan).

Cutting and Welding Creates Precision, Lightweight Structure, Laser Beam — O. Lund and L. Bartoszek, 71 (Mar).

Darkroom Speeds Up Processing of Nondestructive Field Tests, Mobile — 47 (Mar).

Demand for Plastic Parts Builds in the Welding Industry — B. Irving, 31 (Feb).

Destructive Testing Can Keep Failures from Happening, How — B. Irving, 33 (Mar).

Dinos Stand Tall, Jurassic "Sparks": Making the — M. R. Johnsen, 41 (Nov).

Electrode Extension Often Neglected When Using Self-Shielded Cored Wires — R. B. G. Yeo, 51 (Jan).

Electrodes?, What's Behind the Success of the Top Ten Welding — B. Irving, 28 (Jun).

Electron Beam Weld Penetration, Technical Note:

Creating Deeper — P. M. Gross, 61 (Feb).
Evaluating the Use of Homopolar Pulsed Welding on High-Strength Steel Pipe — R. E. Trevisan, M. W. Harville and J. H. Gully, 43 (Jan).
Fatigue Assessment of Weld Imperfections, Recent Advances in the — S. J. Maddox, 42 (Jul).
Fiberscope Evaluates Quality in Pharmaceutical Piping Welds — 61 (Nov).
Fracture of Weldments, Needed: Verified Models to Predict the — D. W. Keefer, W. G. Reuter, H. B. Smartt, J. A. Johnson and S. A. David, 73 (Sep).
Finite Element Thermal Analysis: A Typical Procedure — R. Nugent (Aug).
Flash Weld High-Strength Aluminum Alloys at the Paton Institute, How They Learned to — S. I. Kuchuk-Yatsenko, V. T. Cherednichok and L. A. Semenov, 31 (Jul).
Flux Cored Electrode Developed for Zinc Primer-Painted Steel Plate — M. Kamada, Y. Kanbe, T. Suzuki and S. Maki, 49 (Mar).
Fourth Generation Inverters Add Artificial Intelligence to the Control of GMA Welding — T. J. Nacey, 31 (Jan).
Friction Welding and Surfacing, Sparks Begin to Fly in Nonconventional — B. Irving, 37 (May).
Gas Tungsten Arc Process, Narrow Groove Welding of Titanium Using the Hot-Wire — D. J. Crement, 71 (Apr).
Giant Project for Alaska's Oil Patch Places Heavy Demands on Welding — B. Irving, 43 (Apr).
Giant Tension Leg Platform Ready for Duty in the Gulf of Mexico — B. Irving, 59 (Oct).
GMA Welding Lines Go On-Stream at Arvin Industries, Laser Beam and — B. Irving, 51 (Nov).
Grinding Wheel Safety, Play It Safe at the Wheel: A Primer on — R. L. Karbowski, 35 (Oct).
GTA Welding Handles Pressure of Undersea Application, Orbital — B. K. Henon and M. D. Hayes, 51 (Nov).
Hardness Gradients Within As-Deposited Steel Weld Metals, The Origin of Microstructure and — I. Andersen, A. O. Kluken and Ø. Grong, 63 (Nov).
Helping Hand to American Industry, Uncle Sam Offers a — B. Irving, 77 (Dec).
High-Power Lasers Solve Jet Engine Manufacturer's Welding and Drilling Problems, 54 (Feb).
Highways, Welding Product Helps to Rebuild America's — H. M. Bowman, S. D. Kiser and G. L. Stiltner, 55 (Sep).
Hobart, Michael Wolf Charts New Courses for — B. Irving, 85 (Apr).
Homopolar Pulsed Welding on High-Strength Steel Pi; Evaluating the Use of — R. E. Trevisan, M. W. Harville and J. H. Gully, 43 (Jan).
Hot Water Tanks, Laser Beam Welding Goes into High-Speed Production of Home — M. Garrison, 52 (Dec).
How Those Million-Dollar Research Projects Are Improving the State of the Art of Welding — B. Irving, 61 (Jun).
Hurricane Cleanup Challenges Welders — M. R. Johnsen, 65 (Apr).
How Destructive Testing Can Keep Failures from Happening — B. Irving, 33 (Mar).
How They Learned to Flash Weld High-Strength Aluminum Alloys at the Paton Institute — S. I. Kuchuk-Yatsenko, V. T. Cherednichok and L. A. Semenov, 31 (Jul).
HVOF Process: the Hottest Topic in the Thermal Spray Industry, The — B. Irving, R. Knight and R. Smith, 25 (Jul).
Induction Heating for Deposition of Wear-Resistant Materials, Braze Coat Process Combines with — E. Lugscheider, K. Gundlfinger and H. Schmoor, 55 (May)
Inverters Add Artificial Intelligence to the Control of GMA Welding, Fourth Generation — T. J. Nacey, 31 (Jan).
Inverter Power Sources: An Efficient Alternative — T. Byrd, 37 (Jan).
Inverter Welding Power Source Technology Improves Thermal Spray Coating Deposition — D. Robbins and M. S. Wixson, 49 (Sep).
Jet Engine Manufacturer's Welding and Drilling Problems, High-Power Lasers Solve — 54 (Feb).
Jewelry Gets Extra Sparkle through Welding — M. R. Johnsen, 47 (Jan).
Job: What Welders Want and Companies Need, On the — A. Cullison, M. R. Johnsen, H. Woodward, 30 (Dec).
Jobs for Welders, Big Boom in American Railroads Means More — B. Irving, 39 (Sep).
Jurassic "Sparks": Making the Dinos Stand Tall — M. R. Johnsen, 41 (Nov).
Know Before Choosing a Robotic Welding System, What to — M. Schnee, 58 (Dec).
Laser Beam and GMA Welding Lines Go On-Stream at Arvin Industries — B. Irving, 47 (Nov).
Laser Beam Cutting and Welding Creates Precision, Lightweight Structure — O. Lund and L. Bartoszek, 71 (Mar).
Laser Beam Welding Goes into High-Speed Production of Home Hot Water Tanks — M. Garrison, 52 (Dec).
Laser Facility, Technology Transfer Is the Mission of Penn State's — R. P. Martukanitz, T. A. Marsico and E. J. Whitney, 65 (Dec).
Lasers Solve Jet Engine Manufacturer's Welding and Drilling Problems, High-Power — 54 (Feb).
Low-Spatter Arc Welding Machine, The Surface-Tension-Transfer Power Source: A New — E. K. Stava, 25 (Jan).
Michael Wolf Charts New Courses for Hobart — B. Irving, 85 (Apr).
Microcomputer Takes Charge for Controlling Welding — B. Irving, 49 (May).
Microstructure and Hardness Gradients Within As-Deposited Steel Weld Metals, The Origin on — I. Anderson A. O. Kluken and Ø. Grong, 63 (Nov).
Mobile Darkroom Speeds Up Processing of Nondestructive Field Tests — 47 (Mar).
Models to Predict the Fracture of Weldments, Needed: Verified — D. W. Keefer, W. G. Reuter, H. B. Smartt, J. A. Johnson and S. A. David, 73 (Sep).
Multiprocess Power Sources Aid Manufacturer — 58 (Jan).
Narrow Groove Welding of Titanium Using the Hot-Wire Gas Tungsten Arc Process — D. J. Crement, 71 (Apr).
Needed: Verified Models to Predict the Fracture of Weldments — D. W. Keefer, W. G. Reuter, H. B. Smartt, J. A. Johnson and S. A. David, 73 (Sep).
Nitrogen-Based Atmosphere Offers Advantages, Brazing in a — B. B. Bonner, D. Garg and P. T. Kilhefner, 31 (Oct).
Nondestructive Field Tests, Mobile Darkroom Speeds Up Processing of — 47 (Mar).
Nondestructive Testing of Spot Weld Quality, Classification Trees Prove Useful in — A. Ercil, Y. Denizhan, A. Okcular and G. Zora, 59 (Sep).
Nondestructive Testing of Welds and Heat-Affected Zones?, What's New in — C. J. Hellier, 39 (Mar).
Nuclear Test Facility, Oxygasoline Torch Cuts Demolition Time of — J. Gezelman, 81 (Apr).
One Side Welding Challenges Shipbuilders— L. G. Kvidahl, 47 (Feb).
Orbital Welding Reaches a New Level of Performance, Computer-Aided — J. G. Galloway, P. Y. Y. Maak and

S. C. McNabb, 23 (Feb).
Origin of Microstructure and Hardness Gradients Within As-Deposited Steel Weld Metals, The — I. Andersen, A. O. Kluken and Ø. Grong, 63 (Nov).
Oxygasoline Torch Cuts Demolition Time of Nuclear Test Facility — J. Gezelman, 81 (Apr).
Paton Institute, How They Learned to Flash Weld High-Strength Aluminum Alloys at the — S. I. Kuchuk-Yatsenko, V. T. Cherednichok and L. A. Semenov, 31 (Jul).
Penetration, Technical Note: Creating Deeper Electron Beam Weld — P. M. Gross, 61 (Feb).
Pipe and Tube Weld Cleaning, Brushing Up on — R. C. Sawyer, 71 (Dec).
Pipe Edge Preparation Calls for the Right Equipment, Tube and — J. Digiacomo, 47 (Dec).
Pipe, Evaluating the Use of Homopolar Pulsed Welding on High-Stength Steel — R. E. Trevisan, M. W. Harville and J. H. Gully, 43 (Jan).
Pipeline, Welding the Maui A-B — P. Butler, J. G. Emmerson and R. Van Den Berg, 31 (Nov).
Piping Welds, Fiberscope Evaluates Quality in Pharmaceutical — 61 (Nov).
Pharmaceutical Piping Welds, Fiberscope Evaluates Quality in — 61 (Nov).
Plasma Arc Cutting System Speeds Up Shipbuilder's Production, Switch to — 65 (Feb).
Plastic Parts Builds in the Welding Industry, Demand for — B. Irving, 31 (Feb).
Play It Safe at the Wheel: A Primer on Grinding Wheel Safety — R. L. Karbowski, 35 (Oct).
Preparation Calls for the Right Equipment, Tube and Pipe Edge — J. Digiacomo, 47 (Dec).
Power Source Technology Improves Thermal Spray Coating Deposition, Inverter Welding — D. Robbins and M. S. Wixson, 49 (Sep).
Power Sources Aid Manufacturer, Multiprocess — 58 (Jan).
Power Source: A New Low-Spatter Arc Welding Machine, The Surface-Tension-Transfer — E. K. Stava, 25 (Jan).
Powder Metal Parts?, What Are the Joining Processes, Materials and Techniques for — J. A. Hamill, JR., 37 (Feb).
Present Triumphs and Future Problems with Wave Soldering, The — P. T. Vianco, 39 (Oct).
Quality Conflicts?, What are the Causes and Solutions to Weld — R. L. Holdren, 57 (Aug).
Railroads Means More Jobs for Welders, Big Boom in American — B. Irving, 39 (Sep).
Railroad to Keep the Trains Running on Time, College Couples with — M. R. Johnsen, 81 (Sep).
Rapid Infrared Joining Takes on the Advanced Materials — C. A. Blue, S. G. Warrier, M. T. Robson and R. Y. Lin, 51 (Jun).
Recent Advances in the Fatigue Assessment of Weld Imperfections — S. J. Maddox, 42 (Jul).
Refinery Repair, Solution Anneal Proves Critical to — J. Hill, 55 (Jan).
Research Projects Are Improving the State of the Art of Welding, How Those Million-Dollar — B. Irving, 61 (Jun).
Resistance Seam Welding of Thin Copper Foils— D. L. Hollar, Jr., 37 (Jun).
Resistance Weld Controller Delivers the Heat Where It's Needed — A. Cullison, 47 (Jun).
Robot Keep in Touch with Manufacturer, Computers Let — R. P. Martukanitz, T. A. Marsico and E. J. Whitney, 65 (Dec).
Robotic Welding System, What to Know Before Choosing a — M. Schnee, 58 (Dec).
Russian and Ukranian Welding Industries Learn to Handle Change — H. G. Ziegenfuss, 63 (Mar).
Safety, Play It Safe at the Wheel: A Primer on Grinding Wheel — R. L. Karbowski, 35 (Oct).
Sculpture Finds a Home in Key West, *Stargazer* Reef — J. D. Weber, 52 (Aug).
Seam Welding of Thin Copper Foils, Resistance — D. L. Hollar, Jr., 37 (Jun).
Self-Shielded Cored Wires, Electrode Extension Often Neglected When Using — R. B. G. Yeo, 51 (Jan).
Semiautomatic Welding, The Basics of — G. D. Uttrachi and D. W. Meyer, 47 (Aug).
Shipbuilder's, One Side Welding Challenges — L. G. Kvidahl, 47 (Feb).
Shipbuilder's Production, Switch to Plasma Arc Cutting System Speeds Up — 65 (Feb).
Software for Welding, Competitive Forces Demand Growth of Application — N. D. Gustafson, 43 (May).
Software Improves Weld Program Management, Computer — C. Minda and A. Johnson, 52 (May).
Software Tracks the Life of Welding Projects, Computer — 47 (May).
Soldering in Space, U.S. Astronaut Experiments with — P. Chien, 46 (Oct).
Soldering Operations, What to Consider Before Automating Brazing and — C. M. Norlin, 57 (Oct).
Solution Anneal Proves Critical to Refinery Repair — J. Hill, 55 (Jan).
Sparks Begin to Fly in Nonconventional Friction Welding and Surfacing — B. Irving, 37 (May).
Spot Weld Quality, Classification Trees Prove Useful in Nondestructive Testing of — A. Ercil, Y. Denizhan, A. Okcular and G. Zora, 59 (Sep).
Spot Weld Quality, Tip Force Control Equals — R. B. Hirsch, 57 (Mar).
Stainless Steels, What You Should Know About Austenitic — H. R. Castner, 53 (Apr).
Stargazer Reef Sculpture Finds a Home in Key West — J. D. Weber, 52 (Aug).
Surface-Tension-Transfer Power Source: A new Low-Spatter Arc Welding Machine, The — E. K. Stava, 25 (Jan).
Switch to Plasma Arc Cutting System Speeds Up Shipbuilder's Production — 65 (Feb).
Technical Note: Creating Deeper Electron Beam Weld Penetration — P. M. Gross, 61 (Feb).
Techniques for Aluminum Brazing in Vacuum Furnaces — W. Hoke III and C. Amenheuser, 65 (Oct).
Tension Leg Platform Ready for Duty in the Gulf of Mexico, Giant — B. Irving, 59 (Oct).
Testing Can Keep Failures from Happening, How Destructive — B. Irving, 33 (Mar).
Testing of Welds and Heat-Affected Zones?, What's New in Nondestructive — C. J. Hellier, 39 (Mar).
Thermal Analysis: A Typical Procedure, Finite Element — R. Nugent, 67 (Aug).
Thermal Spray Coating Deposition, Inverter Welding Power Source Technology Improves — D. Robbins and M. S. Wixson, 49 (Sep).
Thermal Spray Coatings Broaden Their Applications, Advances in — E. Sampson, 39 (Jul).
Thermal Spray Industry, The HVOF Process: the Hottest Topic in the — B. Irving, R. Knight and W. Smith, 25 (Jul).
Thermal-Sprayed Zinc Coatings Defend Steel and Concrete Bridges — B. Irving, 69 (Sep).
Tip Force Control Equals Spot Weld Quality — R. B. Hirsch, 57 (Mar).

Tips on Fabricating a Welded Utility Trailer — T. Warren, W. Sistrunk and O. Davis, 57 (Jun).
Titanium Using the Hot-Wire Gas Tungsten Arc Process, Narrow Groove Welding of — D. J. Crement, 71 (Apr).
Top Ten Welding Electrodes?, What's Behind the Success of the — B. Irving, 28 (Jun).
Trailer, Tips on Fabricating a Welded Utility — T. Warren, W. Sistrunk and O. Davis, 57 (Jun).
Tube and Pipe Edge Preparation Calls for the Right Equipment — J. Digiacomo, 47 (Dec).
Tube Framework, Cleveland Baseball Stadium Scores with Welded — 57 (Nov).
Tube Weld Cleaning, Brushing Up on Pipe and — R. C. Sawyer, 71 (Dec).
Uncle Sam Offers a Helping Hand to American Industry — B. Irving, 77 (Dec).
Undersea Application, Orbital GTA Welding Handles Pressure of — B. K. Henon and M. D. Hayes, 51 (Nov).
Unraveling the Mysteries of Welding Cast Iron — S. D. Kiser and B. Irving, 39 (Aug).
Wave Soldering, The Present Triumphs and Future Problems with — P. T. Vianco, 39 (Oct).
Weld Imperfections, Recent Advances in the Fatigue Assessment of — S. J. Maddox, 42 (Jul).
Weld Program Management, Computer Software Improves — C. Minda and A. Johnson, 52 (May).
Welders, Hurricane Cleanup Challenges — M. R. Johnsen, 65 (Apr).
Welders Want and Companies Need, On the Job: What — A. Cullison, M. R. Johnsen, H. Woodward, 30 (Dec).
Welding Creates Precision, Lightweight Structure, Laser Beam Cutting and — O. Lund and L. Bartoszek, 71 (Mar).
Welding Exposition: 1993 Review, AWS International — A. Cullison and B. Irving, 29 (Aug).
Welding Gives Troubled Youth a New Beginning — 57 (Feb).
Welding Industries Learn to Handle Change, Russian and Ukranian — H. G. Ziegenfuss, 63 (Mar).
Welding the Maui A-B Pipeline — P. Butler, J. G. Emmerson and R. Van Den Berg, 31 (Nov).
Welding Product Helps to Rebuild America's Highways — H. M. Bowman, S. D. Kiser and G. L. Stiltner, 55 (Sep).
Welding Work Space Is Ergometric, Efficient and Economical, A Well-Designed — R. Olsson, 51 (Oct).
Well-Designed Welding Work Space Is Ergometric, Efficient and Economical, A — R. Olsson, 51 (Oct).
Will the YAG Laser Revolutionize Automotive Manufacturing? — B. Irving, 52 (Jul).
What Are the Causes and Solutions to Weld Quality Conflicts? — R. L. Holdren, 57 (Aug).
What Are the Joining Processes, Materials and Techniques for Powder Metal Parts? — J. A. Hamill, Jr., 37 (Feb).
What You Should Know About Austenitic Stainless Steels — H. R. Castner, 53 (Apr).
What's Behind the Success of the Top Ten Welding Electrodes? — B. Irving, 28 (Jun).
What's New in Nondestructive Testing of Welds and Heat-Affected Zones? — C. J. Hellier, 39 (Mar).
What to Consider Before Automating Brazing and Soldering Operations — C. M. Norlin, 57 (Oct).
Wolf Charts New Courses for Hobart, Michael — B. Irving, 85 (Apr).
YAG Laser Revolutionize Automotive Manufacturing?, Will the — B. Irving, 52 (Jul).
Youth a New Beginning, Welding Gives Troubled — 57 (Feb).
Zinc Coatings Defend Steel and Concrete Bridges, Thermal-Sprayed — B. Irving, 69 (Sep).
Zinc Primer-Painted Steel Plate, Flux Cored Electrode Developed for — M. Kamada, Y. Kanbe, T. Suzuki and S. Maki, 49 (Mar).

PART 2 — WELDING RESEARCH SUPPLEMENT

SUBJECT INDEX

Alloying Element Vaporization during Laser Beam Welding of Stainless Steel, Toward Understanding — K. Mundra and T. DebRoy, 1-s (Jan).

Aluminide, Weldability of Fe_3Al-Type —S. A. David and T. Zacharia, 201-s (May).

Aluminum Bronze (Cu-9Al-4Fe-4Ni), Laser Beam Welded — K. Petrolonis, 301-s (Jul).

Aluminum, Microstructural Evaluation of Low and High Duty Cycle Nd: YAG Laser Beam Welds in 2024-T3 — J. O. Milewski, G. K. Lewis and J. E. Wittig, 341-s (Jul).

Analysis of Metal Transfer in Gas Metal Arc Welding — Y-S. Kim and T. W. Eagar, 269-s (Jun).

Analytical and Experimental Study of the Effect of Welding Parameters on Fusion Welds, An — B. K. Jones, A. F. Emery and S. J. Marburger, 51-s (Feb).

Arc Efficiency at High Pressures in Argon and Helium Tungsten Arcs, Heat Flow and — A. Katsaounis, 447-s (Sep).

Arc Force, Weld Pool Depression, and Penetration during Gas Tungsten Arc Welding, A Study of — S. I. Rokhlin and A. C. Guu, 381-s (Aug).

Austenitic Stainless Welds in Relationship to Evaluating Hot Cracking, Evaluation of Backfilled Solidification Cracks in — C. D. Lundin, C. H. Lee and C. Y. P. Qiao, 321-s (Jul).

Automotive Sheet Steel, Calculation of Laser Beam Weld Specification for — P. -C. Wang, 155-s (Apr).

AWS Task Group Findings on Moisture Testing of Welding Consumables: Progress Report — M. A. Quintana, 409-s (Aug).

Beam Welding, The Limit of Joint Penetration in High Energy Density — S. Chiang and C. E. Albright, 117-s (Mar).

Brazeability of Nickel-Based Brazing Filler Metal Foil for Joining Nickel Base Metal to Mild Steel Base Metal, A Study of — Y. Miyazawa and T. Ariga, 294-s (Jul).

Brazing Titanium-Vapor-Coated Zirconia — M. L. Santella and J. J. Pak, 165-s (Apr).

Calculation of Laser Beam Weld Specification for Automotive Sheet Steel — P. -C. Wang, 155-s (Apr).

Capacitor Discharge Resistance Spot Welding of SiC Fiber-Reinforced Ti-6Al-4V — A. Cox, W. A. Baeslack III, S. Zorko and C. English, 479-s (Oct).

Capacitor Discharge Welding: Analysis through Ultrahigh-Speed Photography — R. D. Wilson, J. R. Woodyard, Sr., and J. H. Devletian, 101-s (Mar).

Carbon Equivalent and Multiplying Factor for Hardenability of Steel — T. Kasuy and N. Yurioka, 263-s (Jun).

Chemical Composition Variations in Shielded Metal Arc Welds — A. Q. Bracarense and S. Liu, 529-s (Dec).

Closed-Loop Control of Weld Pool Depth Using a Thermally Based Depth Estimator — J. -B. Song and D. E. Hardt, 471-s (Oct).

Consumables: Progress Report, AWS Task Group Findings on Moisture Testing of Welding — M. A. Quintana, 409-s (Aug).

Corrosion Behavior of Stainless Steel and High-Alloy Weldments in Aggressive Oxidizing Environments — A. H. Tuthill and R. E. Avery, 41-2 (Feb).

Crack Initiation and Propagation in Butt Joint Welds of an Ultrahigh-Strength Steel, Fatigue — B. Lü, X. Zheng and D. Li, 79-s (Feb).

Cracking of Flux Cored Iron Manganese Aluminum Weld Metal, Stress Corrosion — N. Krishnaraj, K. Prasad Rao and E. G. Ramachandran, 239-s (Jun).

Cracking Susceptibility, Part I: Development of a Method for Quantification, An Evaluation of Heat-Affected Zone Liquation — W. Lin, J. C. Lippold and W. A. Baeslack III, 135-s (Apr).

Current Density Distributions, Tomographic Imaging of Noncircular and Irregular Electron Beam — J. W. Elmer, A. T. Teruya and D. W. O'Brien, 493-s (Nov).

Deformation in GTA-Welded Steel, Residual Stresses and Plastic — P. C. Brand, Th. H. De Keijser and G. Den Ouden, 93-s (Mar).

Determining Joint Penetration in GTAW with Vision Sensing of Weld Face Geometry — Y. M. Zhang, L. Wu, B. L. Walcott and D. H. Chen, 463-s (Oct).

Diffusion Welding of Ti-6Al-4V Alloy, The Roughness in the — H. Andrzejewski, K. F. Badawi and B. Rolland, 435-s (Sep).

Dissimilar Metal Joints, Study of the Martensite Structure at the Weld Interface and the Fracture Toughness of — Z. Wang, B. Xu and C. Ye, 397-s (Aug).

Effect of Magnetic Steering of the Arc on Clad Quality in Submerged Arc Strip Cladding — U. D. Mallya and H. S. Srinivas, 289-s (Jul).

Effect of Welding on the Fatigue Crack Growth Rate in a Structural Steel, The — G. O. Rading, 307-s (Jul).

Effect of Welding Parameters on Penetration in GTA Welds, The — A. A. Shirali and K. C. Mills, 347-s (Jul).

Effects of Process Variables on the Weld Deposit Area of Submerged Arc Welds, The — L. J. Yang, R. S. Chandel and M. J. Bibby, 11-s (Jan).

Effect of Titanium in Manganese-Containing SMA Weld Deposits, The — G. M. Evans, 123-s (Mar).

Effects of Water Backing on SA106GrB Pipe Welds, The — R. K. Bezzant and L. B. Engel, 29-s (Jan).

Electrical Contact Resistance under High Loads and Elevated Temperatures — M. Vogler and S. Sheppard, 231-s (Jun).

Electron Beam Current Density Distributions, Tomographic Imaging of Noncircular and Irregular — J. W. Elmer, A. T. Teruya and D. W. O'Brien, 493-s (Nov).

Error Due to Two-Dimensional Approximation in Heat Transfer Analysis of Welds — V. Kamala and J. A. Goldak, 440-s (Sep).

Evaluation of Backfilled Solidification Cracks in Austenitic Stainless Welds in Relationship to Evaluating Hot Cracking — C. D. Lundin, C. H. Lee and C. Y. P. Qiao, 321-s (Jul).

Evaluation of Heat-Affected Zone Liquation Cracking Susceptibility, Part I: Development of a Method for Quantification, An — W. Lin, J. C. Lippold and W. A. Baeslack III, 135-s (Apr).

Fatigue Crack Growth Rate in a Structural Steel, The Effect of Welding on the — G. O. Rading, 301-s (Jul).

Fatigue Crack Initiation and Propragation in Butt Joint Welds of an Ultrahigh-Strength Steel — B. Lü, X. Zheng and D. Li, 79-s (Feb).

Field Strength of Fillet Welded Assemblies of E-36-4 Steel As a Function of the Penetration of the Weld Subjected to Tensile and Bending Loads, Investigation into the — J. J. Janosch, 355-s (Aug).
Flash Welded Joints in Mild Steel: A Study on the Effects of Welding Parameters, The Quality of — N. Krishnaraj, K. Prasad Rao and E. G. Ramachandran, 239-s (Jun).
Flux Cored Iron Manganese Aluminum Weld Metal, Stress Corrosion Cracking of — K. M. Makhamreh and D. K. Aidun, 247-s (June);
Fracture Properties, Influence of Repair Welding of Aged 18Ni 250 Maraging Steel Weldments on Tensile and — P. P. Sinha, S. Arumugham and K. V. Nagarajan, 391-s (Aug).
Fracture Toughness of Dissimilar Metal Joints, Study of the Martensite Structure at the Weld Interface and the — Z. Wang, B. Xu and C. Ye, 397-s (Aug).
Fuzzy Control Approach to Arc Sensor for Weld Joint Tracking in Gas Metal Arc Welding of Butt Joints, A Self-Organizing — J. -W. Kim and S. -J. Na, 60-s (Feb).
Gas Metal Arc Welding, Analysis of Metal Transfer in — Y-S Kim and T. W. Eagar, 269-s (Jun).
Gas Metal Arc Welding of Butt Joints, A Self-Organizing Fuzzy Control Approach to Arc Sensor for Weld — J. -W. Kim and S. -J. Na, 60-s (Feb).
Gas Metal Arc Welding, A Model for Mass Input Control in — H. B. Smartt and C. J. Einerson, 217-s (May).
Gas-Shielded Welding of C-Mn-Ni Steel, Microstructural and Mechanical Properties of — D. J. Abson, 173-s (May).
Gas Tungsten Arc Welding, A Study of Arc Force, Weld Pool Depression, and Penetration During — S. I. Rokhlin and A. C. Guu, 381-s (Aug).
GMAW, Metal Transfer in Pulsed Current — Y. -S. Kim and T. W. Eagar, 279-s (Jul).
GTA Weld Shape in JBK-75 Stainless Steel, Surface Preparation Effects on — R. D. Campbell, C. R. Heiple, P. L. Sturgill, A. M. Robertson and R. Jamsay, 67-s (Feb).
GTA Welding of Mild Steel, Weld Pool Oscillation during — Y. H. Xiao and G. den Ouden, 428-s (Aug).
GTA Welds, The Effect of Welding Parameters on Penetration in — A. A. Shirali and K. C. Mills, 347-s (Jul).
GTAW with Vision Sensing of Weld Face Geometry, Determining Joint Penetration in — Y. M. Zhang, L. Wu, B. L. Walcott and D. H. Chen, 463-s (Oct).
HAZ Hardness in Welds of Quenched and Tempered HSLA Steels, Prediction of — Z. Zaczek and J. Cwiek, 37-s (Jan).
Hardenability of Steel, Carbon Equivalent and Multiplying Factor for — Y-S. Kim and T. W. Eagar, 269-s (Jun).
Heat-Affected Zone Liquation Cracking Susceptibility, Part I: Development of a Method for Quantification, An Evaluation of — W. Lin, J. C. Lippold and W. A. Baeslack III, 135-s (Apr).
Heat-Affected Zone Thermal Cycles in Inconel® 718 — R. J. Bowers and E. F. Nippes, 523-s (Dec).
Heat Flow and Arc Efficiency at High Pressures in Argon and Helium Tungsten Arcs — A. Katsaounis, 447-s (Sep).
Heat Transfer Analysis of Welds, Error Due to Two-Dimensional Approximation in — V. Kamala and J. A. Goldak, 440-s (Sep).
High-Alloy Weldments in Aggressive Oxidizing Environments, Corrosion Behavior of Stainless Steel and — A. H. Tuthill and R. E. Avery, 41-s (Feb).
High-Strength Cold-Rolled Sheet Steels, Weld Nugget Development and Integrity in Resistance Spot Welding of — Z. Han, J. E. Indacochea, C. H. Chen and S. Bhat, 209-s (May).
Hot Cracking, Evaluation of Backfilled Solidification Cracks in Austenitic Stainless Welds in Relationship to Evaluating — C. D. Lundin, C. H. Lee and C. Y. P. Qiao, 321-s (Jul).
Hot Cracking Behavior of Modified 316 Stainless Steels Designed for High-Temperature Service, Hot Dectility and — C. D. Lundin, C. Y. P. Qiao, T. P. S. Gill and G. M. Goodwin, 189-s (May).
Hot Ductility and Hot Cracking Behavior of Modified 316 Stainless Steels Designed for High-Temperature Service — C. D. Lundin, C. Y. P. Qiao, T. P. S. Gill and G. M. Goodwin, 189-s (May).
HSLA Steels, Prediction of HAZ Hardness in Welds of Quenched and Tempered — Z. Zaczek and J. Cwiek, 37-s (Jan).
Hydrogen Metallic Disbonding of Austenitic Stainless Steel Claddings, Use of Plasma Arc Welding Process to Combat —O. A. Alexandrov, O. I. Steklov and A. V. Alexeev, 506-s (Nov).
Impact Toughness of C-Mn Multilayer Weld Metal at –60°C, Study on — J. H. Chen,T. D. Xia and C. Yan, 19-s (Jan).
Inconel® 718, Heat-Affected Zone Thermal Cycles in — R. J. Bowers and E. F. Nippes, 523-s (Dec).
Influence of Repair Welding of Aged 18Ni 250 Maraging Steel Weldment on Tensile and Fracture Properties — P. P. Sinha, S. Arumugham and K. V. Nagarajan, 391-s (Aug).
Investigation into the Field Strength of Fillet Welded Assemblies of E-36-4 Steel As a Function of the Penetration of the Weld Subjected to Tensile and Bending Loads — J. J. Janosch, 355-s (Aug).
Investigation of the Effect of Welding Parameters on Weld Quality of Plasma Arc Keyhole Welding of Structural Steels — J. K. Martikainen and T. J. I. Moisio, 329-s (Jul).
Joint Penetration in High Energy Density Beam Welding, The Limit of — S. Chiang and C. E. Albright, 117-s (Mar).
Joint Tracking in Gas Metal Arc Welding of Butt Joints, A Self-Organizing Fuzzy Control Approach to Arc Sensor for Weld — J. -W. Kim and S. -J. Na, 60-s (Feb).
Laser Beam Welded Aluminum Bronze (Cu-9Al-4Fe-4Ni) — K. Petrolonis, 301-s (Jul).
Laser Beam Weld Specification for Automotive Sheet Steel, Calculation of — P. -C. Wang, 155-s (Apr).
Laser Beam Welds in 2024-T3 Aluminum, Microstructural Evaluation of Low and High Duty Cycle Nd:YAG — J. O. Milewski, G. K. Lewis and J. E. Wittig, 341-s (Jul).
Laser Beam Welding, Penetration Depth in — E. A. Metzbower, 403-s (Aug).
Laser Beam Welding of Stainless Steel, Toward Understanding Alloying Element Vaporization during — K. Mundra and T. DebRoy, 1-s (Jan).
Limit of Joint Penetration in High Energy Density Beam Welding, The — S. Chiang and C. E. Albright, 117-s (Mar).
Low-Alloy Steel Welded Metal Properties, Oxygen Effect on — N. N. Potapov, 367-s (Aug).
Magnetic Steering of Arc and Bead Characteristics in Submerged Arc Strip Cladding — U. D. Mallya and U. S. Srinivas, 517-s (Nov).
Magnetic Steering of the Arc on Clad Quality in Submerged Arc Strip Cladding, Effect of — U. D. Mallya and H. S. Srinivas, 289-s (Jul).
Manganese Aluminum Weld Metal, Stress Corrosion Cracking of Flux Cored Iron — K. M. Makhamreh and

D. K. Aidun, 247-s (Jun).
Martensite Structure at the Weld Interface and the Fracture Toughness of Dissimilar Metal Joints, Study of the — Z. Wang, B. Xu and C. Ye, 397-s (Aug).
Mechanical Properties of Gas-Shielded Welding of C-Mn-Ni Steel, Microstructural and — D. J. Abson, 173-s (May).
Metal Transfer in Gas Metal Arc Welding, Analysis of — Y-S. Kim and T. W. Eagar, 269-s (Jun).
Metal Transfer in Pulsed Current GMAW — Y. -S. Kim and T. W. Eagar, 279-s (Jul).
Microstructural and Mechanical Properties of Gas-Shielded Welding of C-Mn-Ni Steel — D. J. Abson, 173-s (May).
Microstructural Evaluation of Low and High Duty Cycle Nd:YAG Laser Beam Welds in 2024-T3 Aluminum — J. O. Milewski, G. K. Lewis and J. E. Wittig, 341-s (Jul).
Model for Mass Input Control in Gas Metal Arc Welding, A — H. B. Smartt and C. J. Einerson, 217-s (May).
Moisture Testing of Welding Consumables: Progress Report, AWS Task Group Findings on — M. A. Quintana, 409-s (Aug).
Nickel-Based Brazing Filler Metal Foil for Joining Nickel Base Metal to Mild Steel Base Metal, A Study of Brazeability of — Y. Miyazawa and T. Ariga, 294-s (Jul).
Oscillation during GTA Welding of Mild Steel, Weld Pool — Y. H. Xiao and G. den Ouden, 428-s (Aug).
Oxidizing Environments, Corrosion Behavior of Stainless Steel and High-Alloy Weldments in Aggressive — A. H. Tuthill and R. E. Avery, 41-s (Feb).
Oxygen Effect on Low-Alloy Steel Welded Metal Properties — N. N. Potapov, 367-s (Aug).
Penetration Depth in Laser Beam Welding — E. A. Metzbower, 403-s (Aug).
Penetration during Gas Tungsten Arc Welding, A Study of Arc Force, Weld Pool Depression, and — S. I. Rokhlin and A. C. Guu, 381-s (Aug).
Penetration in GTA Welds, The Effect of Welding Parameters on — A. A. Shirali and K. C. Mills, 347-s (Jul).
Penetration of the Weld Subjected to Tensile and Bending Loads, Investigation into the Field Strength of Fillet Welded Assemblies of E-36-4 Steel As a Function of the — J. J. Janosch, 355-s (Aug).
Photography, Capacitor Discharge Welding: Analysis through Ultrahigh-Speed — R. D. Wilson, J. R. Woodyard, Sr., and J. H. Devletian, 101-s (Mar).
Pipe Welds, The Effects of Water Backing on SA106GrB — R. K. Bezzant and L. B. Engel, 29-s (Jan).
Plasma Arc Keyhole Welding of Structural Steels, Investigation of the Effect of Welding Parameters on Weld Quality of — J. K. Martikainen and T. J. I. Moisio, 329-s (Jul).
Plasma Arc Welding Process to Combat Hydrogen Metallic Disbonding of Austenitic Stainless Steel Claddings, Use of — O. A. Alexandrov, O. I. Steklov and A. V. Alexeev, 506-s (Nov).
Prediction of HAZ Hardness in Welds of Quenched and Tempered HSLA Steels — Z. Zaczek and J. Cwiek, 37-s (Jan).
Prediction of Welding Thermal History by a Comprehensive Solution — T. Kasuya and N. Yurioka, 107-s (Mar).
Process Variables on the Weld Deposit Area of Submerged Arc Welds, The Effects of — L. J. Yang, R. S. Chandel and M. J. Bibby, 11-s (Jan).
Pulsed Current GMAW, Metal Transfer in — Y. -S. Kim and T. W. Eagar, 279-s (Jul).
Repair Welding of Aged 18Ni 250 Maraging Steel Weldments on Tensile and Fracture Properties, Influence of — P. P. Sinha, S. Arumugham and K. V. Nagarajan, 391-s (Aug).
Residual Stress Characterization of Thick-Plate Weldments Using X-Ray Diffraction — C. O. Ruud, J. A. Josef and D. J. Snoha, 87-s (Mar).
Residual Stresses and Plastic Deformation in GTA-Welded Steel — P. C. Brand, Th. H. De Keijser and G. Den Ouden, 93-s (Mar).
Resistance Spot Welding of High-Strength Cold-Rolled Sheet Steels, Weld Nugget Development and Integrity in — Z. Han, J. E. Indacochea, C. H. Chen and S. Bhat, 209-s (May).
Resistance Spot Welding of SiC Fiber-Reinforced Ti-6Al-4V — A. Cox, W. A. Baeslack III, S. Zorko and C. English, 479-s (Oct).
Resistance under High Loads and Elevated Temperatures, Electrical Contact — M. Vogler and S. Sheppard, 231-s (Jun).
Resonance Phenomenon of the Weld Pool and Its Application, Separately Excited — Q. L. Wang, C. L. Yang and Z. Geng, 455-s (Sep).
Roughness in the Diffusion Weldig of Ti-6Al-4V Alloy, The — H. Andrzejewski, K. F. Badawi and B. Rolland, 435-s (Sep).
Self-Organizing Fuzzy Control Approach to Arc Sensor for Weld Joint Tracking in Gas Metal Arc Welding of Butt Joints, A — J. -W. Kim and S. -J. Na, 60-s (Feb).
Semi-Empirical Model for Transverse Weld Deflections of Square Tubular Automotive Beams, A — E. F. Rybicki, G. L. Nagel, R. B. Stonesifer and E. G. Miller, 371-s (Aug).
Separately Exicted Resorance Phenomenon of the Weld Pool and Its Application — Q. L. Wang, C. L. Yang and Z. Geng, 455-s (Sep).
Shielded Metal Arc Welds, Chemical Composition Variations in — A. Q. Bracarense and S. Liu, 529-s (Dec).
SMA Weld Deposits, The Effect of Titanium in Manganese-Containing — G. M. Evans, 123-s (Mar).
Solid-State Welding of a 0.27 Carbon, Chromium/Molybdenum Steel — P. Lefrancois, B. Criqui and M. Hourcade, 313-s (Jul).
Solidification Cracks in Austenitic Stainless Welds in Relationship to Evaluating Hot Cracking, Evaluation of Backfilled — C. D. Lundin, C. H. Lee and C. Y. P. Qiao, 321-s (Jul).
Stainless Steel and High-Alloy Weldments in Aggressive Oxidizing Environments, Corrosion Behavior of — A. H. Tuthill and R. E. Avery, 41-s (Feb).
Stainless Steel Brazed Joints, Microstructural Characterization of Titanium to 304 — P. R. C. Camargo, R. E. Trevisan, and S. Liu, 537-s (Dec).
Stainless Steel Claddings, Use of Plasma Arc Welding Process to Combat Hydrogen Metallic Disbonding of Austenitic — O. A. Alexandrov, O. I. Steklov and A. V. Alexeev, 506-s (Nov).
Stainless Steels Designed for High-Temperature Service, Hot Ductility and Hot Cracking Behavior of Modified 316 — C. D. Lundin, C. Y. P. Qiao, T. P. S. Gill and G. M. Goodwin, 189-s (May).
Stainless Steel, Surface Preparation Effects on GTA Weld Shape in JBK-75 — R. D. Campbell, C. R. Heiple, P. L. Sturgill, A. M. Robertson and R. Jamsay, 67-s (Feb).
Stainless Steel, Toward Understanding Alloying Element Vaporization during Laser Beam Welding of — K. Mundra and T. DebRoy, 1-s (Jan).
Steel, Solid-State Welding of an 0.27 Carbon, Chromium/Molybdenum — P. Lefrancois, B. Criqui and M. Hourcade, 313-s (Jul).

Stress Characterization of Thick-Plate Weldments Using X-Ray Diffraction, Residual — C. O. Ruud, J. A. Josef and D. J. Snoha, 87-s (Mar).
Stress Corrosion Cracking of Flux Cored Iron Manganese Aluminum Weld Metal — K. M. Makhamreh and D. K. Aidun, 247-s (Jun).
Stresses and Plastic Deformation in GTA-Welded Steel, Residual — P. C. Brand, Th. H. De Keijser and G. Den Ouden, 93-s (Mar).
Strip Cladding, Effect of Magnetic Steering of the Arc on Clad Quality in Submerged Arc — U. D. Mallya and H. S. Srinivas, 289-s (Jul).
Strip Cladding, Magnetic Steering of Arc and Bead Characterictics in — U. D. Mallya and H. S. Srinivas, 517-s (Nov).
Structural Steel, The Effect of Welding on the Fatigue Crack Growth Rate in a — G. O. Rading, 307-s (Jul).
Structural Steels, Investigation of the Effect of Welding Parameters on Weld Quality of Plasma Arc Keyhole Welding of — J. K. Martikainen and T. J. I. Moisio, 329-s (Jul).
Study of Brazeability of Nickel-Based Brazing Filler Metal Foil for Joining Nickel Base Metal to Mild Steel Base Metal, A — Y. Miyazawa and T. Ariga, 294-s (Jul).
Study of Cleavage/Fibrous Transition Temperature of 15MnVN Steel Weld Metal, A — X. X. Xu, Y. Su, W. Zhou and H. L. Piao, 257-s (Jun).
Study on Impact Toughness of C-Mn Multilayer Weld Metal at –60°C — J. H. Chen, T. D. Xia and C. Yan, 19-s (Jan).
Study of Arc Force, Weld Pool Depression, and Penetration during Gas Tungsten Arc Welding, A — S. I. Rokhlin and A. C. Guu, 381-s (Aug).
Study of the Martensite Structure at the Weld Interface and the Fracture Toughness of Dissimilar Metal Joints — Z. Wang, B. Xu and C. Ye, 397-s (Aug).
Submerged Arc Strip Cladding, Magnetic Steering of Arc and Bead Characteristics in — U. D. Mallya and H. S. Srinivas, 517-s (Nov).
Submerged Arc Strip Cladding, Effect of Magnetic Steering of the Arc on Clad Quality in — U. D. Mallya and H. S. Srinivas, 289-s (Jul).
Submerged Arc Welds, The Effects of Process Variables on the Weld Deposit Area of — L. J. Yang, R. S. Chandel and M. J. Bibby, 11-s (Jan).
Surface Preparation Effects on GTA Weld Shape in JBK-75 Stainless Steel — R. D. Campbell, C. R. Heiple, P. L. Sturgill, A. M. Robertson and R. Jamsay, 67-s (Feb).
Tensile and Fracture Properties, Influence of Repair Welding of Aged 18Ni 250 Maraging Steel Weldments on — P. P. Sinha, S. Arumugham and K. V. Nagarajan, 391-s (Aug).
Thermal History by a Comprehensive Solution, Prediction of Welding — T. Kasuya and N. Yurioka, 107-s (Mar).
Thick-Plate Weldments Using X-Ray Diffraction, Residual Stress Characterization of — C. O. Ruud, J. A. Josef and D. J. Snoha, 87-s (Mar).
Titanium in Manganese-Containing SMA Weld Deposits, The Effect of — G. M. Evans, 123-s (Mar).
Titanium to 304 Stainless Steel Brazed Joints, Microstructural Characterization of — P. R. C. Camargo,R. E. Trevisan, S. Liu, 537-s (Dec).
Transition Temperature of 15MnVN Steel Weld Metal, A Study of Cleavage/Fibrous — X. X. Xu, Y. Su, W. Zhou and H. L. Piao, 257-s (Jun).
Transverse Weld Deflections of Square Tubular Automotive Beams, A Semi-Empirical Model for — E. F. Rybicki, G. L. Nagel, R. B. Stonesifer and E. G. Miller, 371-s (Aug).
Tomographic Imaging of Noncircular and Irregular Electron Beam Current Density Distributions — J. W. Elmer, A. T. Teruya and D. W. O'Brien, 493-s (Nov).
Toward Understanding Alloying Element Vaporization during Laser Beam Welding of Stainless Steel — K. Mundra and T. DebRoy, 1-s (Jan).
Tungsten Arcs, Heat Flow and Arc Efficiency at High Pressures in Argon and Helium — A. Katsaounis, 477-s (Sep).
Quality of Flash Welded Joints in Mild Steel: A Study on the Effects of Welding Parameters, The — N. Krishnaraj, K. Prasad Rao and E. G. Ramachandran, 239-s (Jun).
Ultrahigh-Strength Steel, Fatigue Crack Initiation and Propagation in Butt Joint Welds of an — B. Lü, X. Zheng and D. Li, 79-s (Feb).
Use of Plasma Arc Welding Process to Combat Hydrogen Metallic Disbonding of Austenitic Stainless Steel Claddings — O. A. Alexandrov, O. I. Steklov and A. V. Alexeev, 506-s (Nov).
Variations in Shielded Metal Arc Welds, Chemical Composition — A. Q. Bracarense and S. Liu, 529-s (Dec).
Water Backing on SA106GrB Pipe Welds, The Effect of — R. K. Bezzant and L. B. Engel, 29-s (Jan).
Weld Nugget Development and Integrity in Resistance Spot Welding of High-Strength Cold-Rolled Sheet Steels — Z. Han, J. E. Indacochea, C. H. Chen and S. Bhat, 209-s (May).
Weld Pool and Its Application, Separately Excited Resonance Phenomenon of the — Q. L. Wang, C. L. Yang and Z. Geng, 455-s (Sep).
Weld Pool Depth Using a Thermally Based Depth Estimator, Closed-Loop Control of — J. -B. Song and D. E. Hardt, 471-s (Oct).
Weld Pool Oscillation during GTA Welding of Mild Steel — Y. H. Xiao and G. den Ouden, 428-s (Aug).
Weldability of Fe_3Al-Type Aluminide — S. A. David and T. Zacharia, 201-s (May).
Weldability of a RS-PM-Al-8Fe-2Mo Alloy — K. Sampath and W. A. Baeslack III, 416-s (Aug).
Welding Parameters on Fusion Welds, An Analytical and Experimental Study of the Effect of — D. K. Jones, A. F. Emery and S. J. Marburger, 51-s (Feb).
Welding Parameters on Penetration in GTA Welds, The Effect of — A. A. Shirali and K. C. Mills, 347-s (Jul).
Welding Parameters on Weld Quality of Plasma Arc Keyhole Welding of Structural Steels, Investigation of the Effect of — J. K. Martikainen and T. J. I. Moisio, 329-s (Jul).
X-Ray Diffraction, Residual Stress Characterization of Thick-Plate Weldments Using — C. O. Ruud, J. A. Josef and D. J. Snoha, 87-s (Mar).
Zirconia, Brazing Titanium-Vapor-Coated— M. L. Santella, J. J. Pak, 165-s (Apr).
